ASK DR. WILLARSDEN

WHAT HAVE YOU DONE TO ADVANCE YOUR SCHOOLING?

I trained at the well-regarded Las Vegas Institute for Advanced Dental Studies, Arrowhead International and the Dr. Dick Barnes Group. I also studied at Occlusion Connections and am on its board of directors. My training made me aware of exciting techniques in cosmetic dentistry, which I have introduced in the recent debut of my new office. In fact, I just completed building a lecture hall for my practice. Here, I'll be teaching doctors from all over the country about the latest advances in cosmetic dentistry.

DOES YOUR OFFICE HAVE ITS OWN ON-SITE DENTAL LAB?

Yes. Because we have our own on-site dental lab, we are able to have more control of our results while creating beautiful smiles. Having our ceramists in house really makes a difference. Our patients really appreciate having the relationship with the ceramists as well as the doctor.

WHAT IS UNIQUE ABOUT YOUR PRACTICE IN TERMS OF ITS AMBIENCE?

The atmosphere is commensurate with highly trained and qualified staff. It's part of the luxury experience discerning patients expect—and receive.

ACCENT ON YOUTH

Jagged edges and discoloration can easily get in the way of a gorgeous smile. That's why Dr. Willardsen got right to the bottom of his patient's concerns, whitening her lower teeth with bleaching and placing eight veneers on her front teeth. "Together, the treatments really gave her that 'wow' look."

BRIGHTEN UP

The True Aesthetics Bleach Pen Whitener brightens even the most yellow of teeth, bleaching away stains and leaving the mouth with a fresh, minty-clean feel. "I wanted to create a product that would allow patients to whiten their teeth outside of the dental office and attain dramatic results," says Dr. Willardsen, the innovator behind the True Aesthetics line.

“patients come to me for show-stopping smiles”

ABOUT DR. WILLARSDEN

IN WHAT WAYS IS YOUR APPROACH ALL-ENCOMPASSING?

We don't just stop at whitening teeth and replacing veneers; we provide patients with alternatives. In particular, we use Cosmécannique® (a massage-based manipulation of tissue) to firm, smooth and promote improved skin tone, thereby decreasing lines and increasing circulation. Couple that with facial training and certain exercises, and you can improve facial tone and create a smile lift.

HOW ARE YOU HELPING SPREAD THE WORD ABOUT THE IMPORTANCE OF ORAL HEALTH?

I am a regular on local television, making frequent appearances where I help viewers select from amongst new dental techniques, including smile makeovers utilizing porcelain veneers.

HOW DO YOU GO ABOUT GENERATING MORE GENUINE-LOOKING SMILES?

My commitment to excellence through natural techniques gives me the insight on how to proceed. In my opinion, nothing is worse than a contrived look. My goal is for every patient to leave looking absolutely natural. Teeth are designed to complement facial type, complexion and overall expression. It's highly individualized.
